# Go! Link®
(GO-LINK)

‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖‖

Go! Link is a single-channel USB interface used to connect many Vernier sensors directly to a Windows® or Macintosh® computer. Some Vernier sensors can also be used when Go! Link is connected to a Chromebook™. For a complete list of compatible sensors, visit www.vernier.com/go

Getting Started

Go! Link with a Computer

1. Install Logger Lite® or Logger *Pro*® software on your computer.
   - Logger Lite is free and can be downloaded at www.vernier.com/loggerlite
   - Logger *Pro* has many additional features and is available for purchase at www.vernier.com/lp
2. Connect Go! Link to the computer's USB port and the sensor to the Go! Link.
3. Start the software. The sensor will be recognized and in most cases will display the live reading. Note: The thermometer shown below is only displayed when using a temperature probe.
4. Click Collect to begin collecting data, if desired, or open an experiment.

Go! Link with a Chromebook

1. Install Graphical Analysis™ (version 1.2 or newer, available in the Chrome web store in late spring 2015).
2. Connect Go! Link to the Chromebook's USB port and the sensor to the Go! Link.
3. Launch Graphical Analysis. The sensor will be recognized and in most cases will display the live reading.
4. Start data collection, if desired.

NOTE: Vernier products are designed for educational use. Our products are not designed nor are they recommended for any industrial, medical, or commercial process such as life support, patient diagnosis, control of a manufacturing process, or industrial testing of any kind.

Specifications

USB specification	1.1
Maximum sampling rate	200 samples/second
Resolution	12 bit
